Incident Lifecycle Automation in ServiceNow

Date	02 October 2026
Name	Kishorekumar M
Project Name	Incident Lifecycle Automation in ServiceNow
Maximum Marks	

1. Problem Statement

In many organizations, IT incidents are reported through emails, phone calls, or informal communication channels. This leads to poor tracking, lack of proper classification, delayed escalations, and minimal visibility into resolution progress. Without structured Incident Management, issues may remain unresolved, SLAs may be breached, and root cause tracking becomes difficult.

Template	Problem Statement 1 (End User)	Problem Statement 2 (Service Desk Agent)
I am	An end user who depends on IT services	A service desk agent handling first-level support
I'm trying to	Report an IT issue and get it resolved quickly	Log, classify and escalate incidents correctly
But	Issues reported by email, phone or informal channels are not tracked or classified	There is no standard intake, so classification and escalation are inconsistent
Because	There is no structured incident management process	Information and knowledge are scattered across channels
Which makes me feel	Unsure about progress and frustrated by delays	Overloaded and unable to escalate quickly

2. Empathy Map (End User)

Quadrant	Observations
Says	"I reported the issue but have no update." "When will it be fixed?"
Thinks	My issue may be lost or ignored. A quick fix would save my working time.
Does	Sends emails, calls the help desk, follows up repeatedly.
Feels	Frustrated by delays and lack of visibility into progress.

3. Brainstorming and Idea Prioritization

#	Idea	Priority
1	Automate the incident lifecycle from creation to resolution using workflow automation	High
2	Standardize incident classification (Category, Subcategory, Urgency, Service, CI)	High

#	Idea	Priority
3	Suggest relevant knowledge articles to agents using Agent Assist	High
4	Reassign incidents to Level 2 Support teams with complete data	High
5	Raise Emergency Change Requests directly from an incident	Medium
6	Create child incidents for related issues	Medium
7	Create Knowledge Articles from resolved incidents to reduce recurring incidents	High
8	Track SLAs and related records from the incident form	Medium

4. Selected Idea

Developed an automated Incident Management solution in ServiceNow that streamlines the incident lifecycle from creation to resolution using workflow automation. Integrated Knowledge Management and Change Management to enable faster issue resolution, reduce recurring incidents, and improve IT service efficiency.
